

DLA-HD750

Full HD D-ILA Home Theatre Front Projector

Winning the TIPA* award for three consecutive years reflects the true potential offered by JVC's DILA technology.

DLA-HD1

DLA-HD100

DLA-HD750

First it was JVC's DLA-HD1, then the DLA-HD100 and this year, the DLA-HD750 has received the prestigious TIPA award 2009 for Best Pro Photo Projector. But it's really no surprise. Offering an incredible native contrast ratio of 50,000:1 without the use of an auto iris — the highest among all currently available home theatre projectors — the DLA-HD750 delivers breakthrough performance in terms of colour accuracy, black levels, and user-friendly operation.

DLA-HD350

Sharing some of the features offered by the high-end DLA-HD750, such as the high-performance 2x zoom lens with motorised focus, the DLA-HD350 offers a native contrast ratio of 30,000:1 and is available in two colours, black or white.
